

# Community Mapping

This activity encourages you to reflect on which groups and institutions are found in your school/college/academy's neighbourhood.

1. Place your school in the centre of the sheet.
2. Record the groups, institutions and neighbours your school already relates to.
3. Write the groups, institutions and neighbours of interest that you and colleagues are aware of, but does not currently relate to.
4. Use a dotted line to join groups that relate to each other.
